1. Background

- 1.1 All District Councils in Gloucestershire generally undertake Employment Land Availability Surveys. This was formerly under the overall co-ordination of Gloucestershire County Council as the main objective of the survey was to monitor the supply of employment land to provide accurate and up-to-date information for the Structure Plan. However, this monitoring work continues to be essential for the evidence base supporting the Local development Framework and the emerging Local Plan.
- 1.2 This ELA survey covers the period 1st April 2012 to 31st March 2013.
- 1.3 Table 4.1 (Employment Land Supply at 1 April 2004) of the Adopted Local Plan (November 2005) provides a basis for comparing the data from this latest Employment Land Availability Survey. Information in Table 1 of this report shows the net change to the stock of employment land (i.e. takes into account losses) in Stroud District and can be used to update Table 4.1 in the Local Plan.

2. Survey Methodology

- 2.1 This paper is an update on the Employment Land Availability Survey of 2012 (ELA 2012). The update involved researching all planning permissions for employment use between 1st April 2012 and 31st March 2013.
- 2.2 The various components of the employment land figures, as shown in Tables 2-5 of the ELA 2011, were amended accordingly. Sites with planning permission, which had not been implemented, were also investigated to ascertain whether the permissions were still valid, or had lapsed.
- 2.3 Those sites, which had previously been in employment use but have since been redeveloped for other uses or demolished, are identified for the 'losses' component of the statistics. Potential losses are also indicated where planning consents have been given that will involve loss of employment land, but as yet have not been fully implemented.
- 2.4 While accurate at the time of publication, this report is subject to change due to continuing monitoring.

3. Summary of Survey Results

- 3.1 The adopted Gloucestershire Structure Plan, Second Review included an allocation of 'about 100 hectares' of employment land for Stroud District for the period 1991-2011. As suggested in paragraph 7.2.1 of the Structure Plan, it is not the intention that this 100 hectare allocation is interpreted as an absolute target, but rather as an indicative figure/estimate to be assessed through regular monitoring and review.
- 3.2 Since 2004, the amount of land developed for employment use has increased from 35.16 hectares to 60.60 hectares (Tables 2a, 2b 2e and 2f). In terms of land with planning permission for employment use, this figure is now 56.92 hectares (Tables 3a & 3b). With regard to losses of employment land to other uses, this figure has increased, from 20.43 hectares to 37.37 hectares (Table 4a & 4b).
- 3.2 Table 1 shows that, as at 31st March 2013 Stroud District has a net provision of employment land of about 114.98 hectares. This net provision of employment land is 14.98 hectares above the Structure Plan requirement of 100 hectares.
