Dear Sir,

I have lived in this village most of my life. I would like it to remain a village not a town like Yate. Too many houses mean more cars. The roads around here cannot take many more. Trying to get on the A38 in the morning is a nightmare at the moment. 5,000 houses means at least ten thousand cars. How are people going to get on A38 and M5 at Falfield to go to work.

There are no jobs around here for local people now. So people have to travel. The roads are in a disgusting state at

the moment. Especially with all the flooding. People are having trouble getting home now with all the fields saturated and ^{water} flowing over the roads.

We are not opposed to some hours with infill but not \$,000. Where will the children go to school. Local primaries are full. They shut our secondary school which was an excellent school. Very shortsighted on the local Education Authority!!

It will be a commuter town, with people going out of village. We have an excellent Post office in Newtown but more people would mean we would need more shops. We need more ^{affordable} bungalows built for older people not thousand of houses. The new factory being built at Howard Teras will mean far more

2.

comes on an already busy road.
which is lots of places are no
more than lanes. We have trouble
already with foreign lanes driving on
the wrong side of the bypass.
The bypass needs to be finished
and the roads upgraded before any kind
of building is started. Who is going to
be able to afford these houses. The
ones they are building on Cannonbury
Rise are not selling well and have
been reduced!!

We would like to keep
Sherpess, Newtown, Wanswell, Brookend
Old and New Habore, Hinton, Parton
as little villages not joining up
to Berkeley. Berkeley no longer has
a bank, hospital or many shops.
The library is currently run by volunteers.
Tried to send this by email.

but it wouldn't take it.
Hope peoples comment are getting to you
would like to know you have
received this. deb job @ btinternet.com

keep our villages as villages
There are plenty of fields from Cambridge
up to ~~St~~ Homebridge by decent
roads that could accommodate
these houses.

Yours S.S.S. 1

My daughter is a nurse in [redacted]
and a lot of times lately she has unable
to get home because of flood water.
That is a big problem around here. More
concrete means more water.
