yet again I write to object to any development to the South east of Dursley. This land is relatively level good quality agricultural land that should not be built on. The land near Ganzell lane is prone to flooding in times of very heavy rain-fall. The water runs off the woodland hills and floods the fields in a number of places.

I live on the A4135 the traffic is much worse (I have lived here 50 yrs) and we still do not know the full impact of the Littlecomb development (many houses still to be built).

②

At peak times the traffic
in Dursley is at a stand-still.
We can't cope with any more
development at this end of town,
you -
