Subject: Priority action

Categories: Consultation response

There is no doubt now that priority must be given to sustainability in all things in order to secure a carbon neutral council and district.

The time is NOW to put all environment issues at the TOP of the agenda not the last item! Priority and incentives and more subsidies given to public transport/cyclists and pedestrians to attract more users.

Electric vehicle charging points, subsidies towards sustainable energy, insulation improvements on all buildings, Pressure on government and supermarkets to find alternative and compostible packaging.

A council run maintenance shop in an empty unit in town for people to have help with fixing household items providing work and social activity.

Green spaces to be protected and more trees to be planted Pressure on Supermarkets and fast food outlets to take responsibility for the amount of litter dropped and fines put in place Car free days in the town Landlords required to allow Use of empty units by educational and creative groups abiding by certain rules and criteria I look forward to seeing some changes in prioritising actions that will help safeguard the environment.
