Dear Sir,

I attended the exhibition in the Sub Rooms and found it very interesting.

With regard to the area designated for possible small scale development in Oakridge Lynch (where I live) I consider this choice very sensible. It would represent in effect an extension of part of the village which contains former Council and Housing Association properties. I am not sure of the situation with regard the the land which used to be known as The Common. It has been divided up into horse grazing sections.

There would be concern if this was a precursor to a major development covering all this site.

Much will depend on the kind of houses to be erected. Ideally they should be more in keeping with the low height Housing Assn buildings and certainly not more £1m 5 bedroom mansions!.

Yours sincerely
